

reflect roof®

Heat reflective roofing system.

Roofing and thermal insulation know-how
in 1 roofing package.

IKO reflect

- Sustainable TPE polymer bitumen roofing membrane
- Radiant white reflective PU top coat
- High reflection value helps save energy
- Flexible and solid positioning for roof details

IKO enertherm

- PIR insulation with high thermal efficiency
- Thinner and better insulation
- Enormous energy savings
- Fire resistant
- Pressure-resistant and robust cell structure

reflect roof

- All products are 100% "IKO Manufactured"
- Increases thermal efficiency and subsequent comfort within the building
- Increases life expectancy of the system due to reduced temperature fluctuations
- Substantial reduction in your energy bills
- Environmentally friendly construction
