

Impressive IKO Solar Project in Lanaken

The **IKO Solar photovoltaic panels** installed on the roof of the Lanaken tennis hall were officially put into operation on 6 November 2009.

A total of **310 solar panels** were installed, comprising a **40 kWp system** that will generate enough capacity to light the hall's 8 tennis courts for 2 hours a day.

This installation is the first major project in which IKO solar panels are so clearly visible.

This impressive project is the result of the excellent cooperation between many people and departments within our group:

- Sales: Danny Pauwels
- IKO Reflect and IKO solar: carried out on behalf of the Beveren Works division
- Electrical installation: carried out by Solar Technics
