

## 70.000 m<sup>2</sup> Polygum

On Friday 22 June 2007, Prince Filip opened the new Bekaert factory, Tire Cord Co. Ltd, in Chandong, close to Beijing in the People's Republic of China.

This is something we also can be proud of.

Already in 2005, Polygum sales director Paul Alenus negotiated the sale to Bekaert Engineering of 35.000 m<sup>2</sup> Polygum Tecno and Turbo Rock as a moisture protection layer (thus x 2). Both parties of course wanted to take no chances and to play it safe.

Bekaert receives full technical support and before the site was commissioned, an agreement was made to have Frank Janssens, our super-pro in the area of flat roofs, to supervise the local roofers for 2 weeks and ensure that the project was on the right track.

This project was executed by the local roofing contractor Bluescope Lyasght under the management of Frank Zhu. With 2 Franks on the roof, success was guaranteed!
