

WATERPROOFING BRIDGE PROJECT OF 136.000 m² IN SYRIA

This Highway project through mountains and valleys is built to connect Latakia, the main port in Syria, to Aleppo the northern industrial capital. This 120 km highway consists of 92 bridges and 136.000 m² surface. The project was handled by Atab Bridge Waterproofing System and is executed by BMC, Atab's certified roofer covered by an international technical Agreement Certificate.

This project is not only remarkable by the surface. Also the technology of putting the asphalt directly over the waterproofing membrane is unique in Syria.

Project : Latakia - Ariha Highway.

Owner: General Establishment for Road Communication.

Consultant: M/S Khatib & Alami.

Main Contractor: M/S Al Kharafi & Sons.

Atab Bridge Waterproofing System: K-SM 170 + Iko primer.

Atab Certified Roofer: M/S BMC Syria.
