REV. – NOVEMBER 2004

ARMOURGARD ICE & WATER PROTECTOR. THE ICE & WATER PROTECTOR APPROVED IN CANADA.

Until now, no standard had been determined.

Unfortunately, no real standard of quality or performance has been determined in Canada to assure the consumer that the ice and water protector they have on their roof will do the job it's designed to do – until now!

Manufactured in Canada – to stand up to Canadian weather conditions.

ArmourGard from IKO Industries Ltd. was the first ice and water protector manufactured in Canada to be tested by a recognized government authority. To the consumer and applicator this means it is the only ice and water protector that:

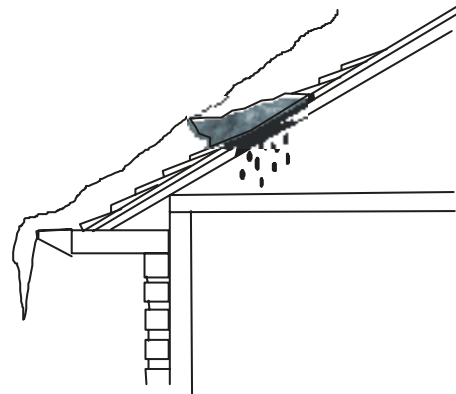

1. Has been independently tested by Canadian Construction Materials Centre (CCMC report 12413-R).
2. Has received an Ontario Ministry of Housing ruling (No. 94-10-10- (12413-R)).
3. Is made in Canada by Canada's largest roofing material manufacturer.

So for peace-of-mind protection on your roof choose the first ice and water protector approved in Canada - choose **ArmourGard Ice & Water Protector** from **IKO!**

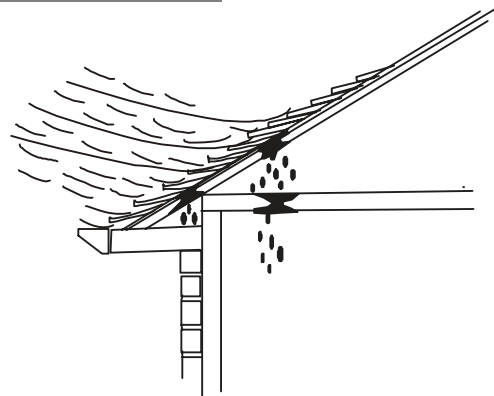

For additional information on any of IKO's products or application requirements, visit us on the web at www.iko.com, or contact us in Canada at 1-888-766-2468, or the United States at 1-888-456-7663.

Weather conditions that cause ice dam formations and wind driven rain can create havoc on your roof.

ICE DAM FORMATION

WIND-DRIVEN RAIN

ARMOURGARD ICE & WATER PROTECTOR FEATURES

- Eliminates water leakage due to ice dams.
- Flexible for superior product performance.
- Slip resistant surface for ease of application.
- Self-sealing around roofing nails.
- Glass fibre reinforced for extra strength.
- CCMC evaluated – Report # 12413-R
- Improved self-sealing adhesion bonds firmly to the roof deck.
- Meets most building code requirements.
