Brewery District Building 3

NEW WESTMINSTER, BC

IKO SBS System Delivers Interesting Rooftop Design for BC Brewery District

The Project:

The Brewery District is a dynamic, progressive area in Metro Vancouver offering a mix of residential high-rises, shops and office buildings. The Brewery District provides quick access to the area and is connected via a SkyTrain to public plazas, greenways, view decks, cycling paths, and a central community green gathering place. This master-planned community includes groceries, pharmacies, restaurants and other mixed use retail outlets.

The Challenge:

The project included roof areas of varying heights. Owner Wesgroup Properties wanted an aesthetically pleasing pattern for their roof design as well as the option for additional storey expansions. IKO was able to meet their expectations with our SBS system using IKO TP 180 Granular Cap in a pattern of multiple colours.

The Solution:

An IKO SBS Roofing System was recommended by GRC Columbia Roofing Inc., based on the specific client requirements to create a colourful rooftop pattern.

PRODUCTS

- IKO MVP Vapour Barrier
- IKO MF 95 SF (Poly/Sand) Vapour Barrier
- IKOTerm III Insulation
- IKO 3/16" Protectoboard
- IKO TP 180 FF Base Sheet
