Sea To Sky Gondola

SQUAMISH, BC

IKO Roofing Products Protect Impressive BC Gondola Project

The Project:

The Sea to Sky Gondola became an instant landmark destination in Squamish, British Columbia when it opened in May 2014. Under construction for over a year, the \$22-million project now provides year-round access to hiking trails, interpretive walks, panoramic views and a 836 sq. m. (9,000 sq. ft.) Summit Lodge where guests can enjoy self-serve dining and local Squamish food and beverage.

The Challenge:

The summit building was constructed and roofed during the winter of 2013/2014. The access road was a steep, single-lane logging road. IKO products were shipped on a flat bed and then pulled uphill by heavy equipment to reach the access site.

The Solution:

IKO SBS products were used on all low slope roof buildings, including the mechanical building, ticket booths and reception/office/café areas. The summit building has a full-sloped EPS package along with IKO MVP and IKOTherm™ III, for an R-28 rating in this mountain top zone.

Garibaldi roofing uses IKO materials on the majority of its contracted work. According to Garibaldi Roofing, “We have been very happy with the product, its application, and the technical support from IKO, along with strong supplier support from Roofmart. This is one of our signature projects and we were thrilled to be part of it.”
