IKO S.A.M. Adhesive is an outstanding quick drying product for self-adhering membranes. Let S.A.M. Adhesive go to work for your next commercial building project.

- EXCELLENT ADHESION
- VERSATILE

### Multi-Use

IKO S.A.M Adhesive is a surface conditioner where asphaltic self-adhesive membranes are applied. It is suitable for use on most substrates including wood, glass mat/gypsum sheathing, masonry, concrete and metal.

### Cleans and Dries Quickly

IKO S.A.M. Adhesive is a quick-drying, solvent-based surface preparation for use with IKO self-adhering roofing membranes or IKO AquaBarrier self-adhering membranes. All substrates should be clean, dry and free from dust, dirt, oil and grease. IKO S.A.M. Adhesive cleans up easily with mineral spirits.

### Ideal for Vertical & Horizontal Surfaces

S.A.M. provides excellent adhesion properties during the application process, and is very effective on either horizontal or vertical surfaces. Actual drying time depends on the ambient temperature and humidity during application, but requires a minimum of 30 minutes for flash-off time. Membrane must be applied within 4 hours of priming the substrate.

### Easy to Apply/Bulk Packaged

IKO S.A.M. Adhesive may be applied by using a brush, roller, or by mechanically spraying.
