IKO Cold Gold System Covers a Canadian Treasure.

The Project

The Bata Shoe Museum is a high-profile commercial roofing project featuring IKO Industries' Cold Gold Roofing Membrane System. According to IKO Field Service Technician Mike Bisson, "Since a flame-free installation was specified, the client chose this system. This allowed us to meet the customer's expectations as well as effectively meet the challenges of installing in a busy downtown Toronto area."

The Challenge:

According to Mark Baxter, VP of Business Development for Semple Gooder Roofing, the Bata Shoe Museum re-roof was a very sensitive project. "With the nature of this building and its purpose, it is absolutely intolerant to leaks. The installation had to be flame free and odour free, so this eliminated a lot of obstacles for us," says Baxter. "All materials were moved by crane up to the roof."

The Solution:

The Bata Shoe Museum's IKO Roofing System is comprised of Armourgard™ Ice & Water™ Vapor Barrier, PolyIso Insulation, Protectoboard™, Modiflex™ MF-95 SS Base Sheet with a layer of Cold Gold™ Adhesive, and then a Modiflex™ MP 180 Cap Sheet adhered with an additional layer of Cold Gold Adhesive. According to Baxter, "The end result was a really nice looking project. Access was a challenge and fortunately IKO's system minimized the need for rooftop equipment."

PRODUCTS

- IKO ArmourGard Ice & Water Commercial Peel & Stick
- 1.5 in IKOTherm™ Insulation
- One layer of 1/4 in IKO Protectoboard overlay
- Modiflex MF-95-SS-Base Sheet Cold Applied
- Modiflex MP-180-Cap Sheet Cold Applied
- Cold Gold Field Adhesive
- Cold Gold Flashing Adhesive

“The end result was a really nice looking project. Access was a challenge and fortunately IKO's system minimized the need for rooftop equipment.”

- Mark Baxter
VP of Business Development
