# Project Profile

BramCal Production, Inc.

TORONTO, ONTARIO

## The Project

BramCal produces the printed film wrappers used to wrap IKO residential roofing shingle bundles and some rolled roofing. The manufacturing facility also produces shrink-wrap hooder bags for 48-inch pallets and 4, 6 and 8-foot polyisocyanurate board skids. This Barrie, Ontario location supplies all of IKO North America.

The construction team included Blanchfield Roofing Co. Ltd., a long-standing member of both the Ontario Industrial Roofing Contractors Association and the Canadian Roofing Contractors Association.

Blanchfield Roofing is also a valued member of the IAAP (IKO Approved Applicator Program).

## The Challenge

Because the facility is so integral to many IKO operations, it was necessary to specify a roof type that could withstand the test of time and harsh weather conditions, and also minimize any interruption to production. According to Kevin Beaudry, plant manager, it was essential to collaborate with a key roofing contractor to make this project a success.

Blanchfield Roofing, with over 55 years of roofing experience in the North Bay, Sudbury, Sault Ste. Marie, Hurst, Barrie, Peterborough and Petawawa markets, was selected. Megan Delorme, vice president and CEO of Blanchfield, said, "We have developed a solid reputation in the industry and are committed to maintaining this reputation while meeting a diversity of demands, from small roof repairs to large-scale roof retrofits." Paula Chateauvert, architectural and technical representative, IKO Ottawa/North, added, "Megan is a valued client of IKO and is excellent to work with."

## The Solution

The IKO Innovi™ 60-mil TPO white membrane, mechanically attached, was specified. InnoviFast™ AP Fasteners (#14) and 2-inch Seam Plates were used for the membrane, and InnoviFast Insulation Fasteners (#12) with Insulation Plates were used with the IKOTerm™ CoverShield Cover Board. The first insulating layer under the cover board selected was IKOTerm 25-psi 4-foot-by-4-foot boards. The edge termination was secured by InnoviFast AP Termination Bars and #15 HD Fasteners.

### IKO INNOVI ROOFING SYSTEM

- Innovi 60-mil TPO white membrane
- InnoviFast AP Fasteners (#14)
- 2-inch Seam Plates
- InnoviFast Insulation Fasteners (#12) with Insulation Plates
- IKOTerm CoverShield Cover Board
- IKOTerm 25-psi 4-foot-by-4-foot boards
- InnoviFast AP Termination Bars
- #15 HD Fasteners
