IKO AquaBarrier™ BSW

BLINDSIDE WATERPROOFING

IKO.COM/COMM

IKO AquaBarrier Blindsight

Waterproofing is an SBS modified sheet membrane designed to provide dependable primary waterproofing in below grade commercial installations. IKO AquaBarrier BSW System has both a vertical (BSW-V) and a horizontal (BSW-H) product to deliver a waterproofing solution for various blindsight waterproofing applications. Reliable and strong, let IKO's AquaBarrier blindsight waterproofing go to work for your next below grade commercial building project.

System Advantages:

- Ideal for below-grade blindsight waterproofing applications that don't allow for extra excavation.
- Application-specific waterproofing product for horizontal (BSW-H) and vertical (BSW-V) blindsight installations.
- Part of a total foundation blindsight waterproofing system. Contact your IKO representative for details.
- Designed to provide dependable primary waterproofing in below-grade commercial installations with great resistance to hydrostatic pressure.

IKO AquaBarrier BSW-H

IKO AquaBarrier BSW-H is a polyester-reinforced SBS modified sheet membrane designed to provide dependable primary waterproofing in below grade commercial installations. AquaBarrier BSW-H provides an effective barrier to moisture, vapour transmission and air leakage when installed according to IKO specifications.

Product Highlights:

- Strong highly engineered composite reinforcement.
- Resistant to hydrostatic pressure.
- Good adhesion to concrete.
- Sanded surface and thermofusible film underside which allows for heat welding of layers in two-ply systems.

IKO MS Detail is a solvent-free, liquid-applied membrane coating that serves as an excellent waterproofing option for hard to flash-in areas. This product was designed to coat and protect complex details such as flashings which would normally require intricate labor.

IKO AquaBarrier BSW-V

IKO AquaBarrier BSW-V is a self-adhering, SBS modified composite sheet membrane designed to provide dependable primary waterproofing in below-grade commercial installations. AquaBarrier BSW-V offers superior performance for foundations with urban space constraints, below grade and other critical areas where waterproofing is required.

Product Highlights:

- Exceptional bonding strength.
- Ideal for zero lot line space constraints.
- Self-adhesive underside with release film/sanded top surface.
- Dual selvage configuration, 2" self-adhesive and last 2" heat sealable.
- Installed over drainage mat primed with IKO S.A.M. adhesive (where required).
