

SBS DeckBase 44®

FIBERGLASS-REINFORCED DECK PROTECTION

IKO's SBS DeckBase 44 is a polymer-modified bitumen roll roofing product. The inner reinforcement consists of a tough, non-woven, glass fibre mat, which has been impregnated and coated with a specially formulated modified bitumen with exceptional elasticity. At 44" wide, this underlay makes installation easy and offers durable, substantial protection from the elements at your roof's eaves. It lays flat for a uniform look, so you don't have to worry about unevenness. It's not a peel and stick product, which means it's easy to remove when it's time to re-roof.

IKO SBS DeckBase 44 is a fiberglass reinforced polymer-modified bitumen deck protection membrane.

FEATURES AND BENEFITS

- ✓ EXTRA-WIDE ROLL
- ✓ FLEXIBLE AND LIGHTWEIGHT
- ✓ TEAR-RESISTANT MEMBRANE

GENERAL INFORMATION

AREA/ROLL	216 ft. ² (20 m ²)
ROLLS/PALLET	40
PALLET SIZE	52 x 44 in. (132 x 112 cm)
PRODUCT STOCK NO.	0630018

PRODUCT DIMENSIONS

LENGTH	59 ft. (18 m)
WIDTH	44 in. (1118 mm)
THICKNESS	55 mils (1.4 mm)

Product dimensions shown are subject to normal manufacturing tolerances of +/- 0.5 ft. (0.15 m) on the sheet's length and +/- 1/8 in. (3 mm) on width.

SBS DeckBase 44

APPLICABLE STANDARDS¹

ASTM D4601, Type 1

Satisfies the requirements of the Canadian NBC 9.26.5.2 (c)

NOTE: Product meets or exceeds the requirements in the product standards referenced, including tensile strength and cold flexibility.

DECK PROTECTOR INSTALLATION

Synthetic Underlayment

SBS Deckbase 44

SAFETY INFORMATION

CAUTION: Working at heights on sloped-roof surfaces can be dangerous. Do not install until all appropriate safety precautions are followed. Always wear appropriate personal protective equipment (PPE), including appropriate fall protection equipment.

This product's Safety Data Sheet (SDS) is available [here](#).

SBS Deckbase 44

Ice and water protector must be installed according to all of IKO's application instructions. Some select installation requirements are highlighted here:

1. The space beneath the roof deck (e.g., attic) should be thoroughly ventilated to minimum local building code requirements.
2. Apply the membrane as per building code requirements overhanging eaves by 1/4-inch to 3/4-inch and extending up the roof at least 24 inches from the vertical projection of the interior surface of the outside wall.
3. End laps must be at least 6 inches and should be located at least 24 inches from those in the previous course.
