

SBS DeckBase 44

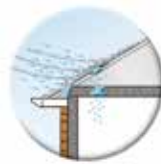

PREMIUM EAVE PROTECTION & UNDERLAYMENT

Larger 44" size covers more area in less time.

- ✓ **Extra-wide 44" roll size**
 - Allows for one-ply application at the eave on most roof designs.
 - Covers almost 60 linear feet of eave in a single course.
- ✓ **Compatible with asphalt shingles**
 - Provides extra protection between shingles and the roof deck.
- ✓ **Easy to remove when it's time to re-roof**
 - Doesn't adhere to the roof deck.
- ✓ **Flexible, thin and lightweight for easy handling and application**
 - Lays flat for a better-looking roof.
- ✓ **Glass fibre reinforced for extra strength**
- ✓ **Improved flexibility for superior performance**
- ✓ **Tear-resistant membrane**

IKO SBS DeckBase 44 is a modified bitumen roll roofing product. The inner membrane of the roll consists of a tough, nonwoven, glass fibre mat, which has been impregnated and coated with a specially formulated modified bitumen with exceptional elasticity. The top surface provides the product with a slip-resistant surface for safety.

Protects Against Wind-Driven Rain

Wind-driven rain can get blown under the shingles, allowing water to penetrate through the unprotected roof deck, causing interior damage. Roofs with lower slopes (2:12 to 5:12) are even more susceptible to this problem.

Helps Prevent Damage From Ice Dams

When melted snow runs down the roof to the colder eaves, an ice dam can form and cause water to back up under the shingles. Eventually, the water penetrates the unprotected roof deck and leaks through, damaging the building's interior.

Slip-Resistant Surface

IKO SBS DeckBase 44 is sanded on the top to create a slip-resistant surface.
