NORDIC™

Performance Shingles

iko.com/na

Top-Tier Performance in Every Shingle

One of IKO's highest performing products, Nordic shingles are made with polymer-modified asphalt to help cushion severe weather impact with a rubber-like effect. This earns them a Class 4 impact resistance rating⁵ — the highest possible against hail. That's why we recommend them for homes in the most severe-weather areas (where Nordic shingles are sold).

IKO Nordic shingles qualify for a Class 4 impact resistance rating,⁵ — the highest possible — thanks to polymer-modified asphalt that acts as a shock absorber.

You may never find a better shingle for your money than with IKO's Nordic shingles. That's because Nordic offers all the quality of Performance shingles, plus the highest impact resistance rating in one best-in-class product.

The IKO Difference

With a legacy of craftsmanship that spans over 75 years, we know quality. That's why contractors and their customers trust IKO to deliver beautiful, high-performing roofing systems that can withstand the most rigorous conditions — and continue protecting families for generations to come.

What Sets Nordic Shingles Apart

1 Superior blow-off protection
IKO Performance shingles feature a tear-resistant woven band on the back, designed to help prevent nail pull-through and shingle blow-off. A 1 1/2-inch-wide nailing surface on the front guides roofers to place their nails accurately, ensuring improved fastening strength and faster installation.

2 Stay-put bonding
IKO's proprietary FastLock® sealant gets extra tacky when activated by the heat of the sun to maximize bonding and help protect against wind uplift and blow-off.

3 Tough adhesive
We use five strips of our tough, construction-grade adhesive to laminate the shim to the tooth.

4 Built-in algae resistance
Colourfast algae-resistant granules help inhibit the growth of blue-green algae, which can cause unsightly black streaks, stains, or discolouration.

5 Granule coverage and adhesion
We make nearly every material we use, including the granules used to protect underlying asphalt. Our exclusive, advanced colour blending technology creates beautiful, enhanced colour blends to fit nearly every home design and style.

6 Heavyweight strength
At the heart of every IKO asphalt shingle is a fiberglass mat. Weathering asphalt saturates the mat and coats its top and bottom layers. Protective granules on the surface ensure a durable, structurally sound product.

STANDARDS & SPECIFICATIONS^{3,4}

Limited Warranty ¹	Limited Lifetime ²	Length	40 7/8 in (1,038 mm)
Iron Clad Protection ¹	15 Years	Width	13 3/4 in (349 mm)
Limited Wind Warranty ¹	210 km/h (130 mph)	Exposure	5 7/8 in (149 mm)

▶ SEE IT ON A ROOF

Nordic shingles offer the strength, protection, and appeal homeowners like you expect. These shingles are engineered for ultimate performance with features like:

- ✔ Polymer-modified asphalt for exceptional shock-absorbing capabilities.
- ✔ Durable fiberglass mat core.
- ✔ Thick, asphalt coating for heavier weight that helps shingles lie flat and stay put.
- ✔ FastLock sealant, activated by the warmth of the sun to seal down and help protect against wind uplift.
- ✔ ArmourZone® 1 ¼-inch reinforced woven band nailing surface for unparalleled holding power.
- ✔ Class 4 impact resistance rating⁵ against hail, the highest possible*.
- ✔ A wide range of blue-green algae-resistant, enhanced colour blends.

+ *Nordic shingles carry a 210 km/h (130 mph)¹ limited wind warranty.*

⁵The impact resistance ratings are solely for the purpose of enabling residential property owners to obtain a reduction in their residential insurance premium, if available. *This is not a guarantee of impact resistance against hail. Damage from hail is not covered under the limited warranty.

Shingles are your home's first line of defense, but they protect, perform and look their best installed with the **IKO Proformax Integrated Roofing Accessories** shown below.

PROFORMAX ROOFING COMPONENTS

1 DECK PROTECTION	2 SYNTHETIC UNDERLAYMENT	3 ROOF STARTERS	4 CAPPING SHINGLES
IKO GoldSeam™ IKO StormShield®	IKO Stormtite®	IKO Leading Edge Plus™ or IKO EdgeSeal®	IKO Ultra-HP® IR IKO Hip & Ridge Class 4

IMPORTANT! To ensure complete satisfaction, please view several full-size shingles and an actual roof installation prior to final colour selection as the shingle swatches and photography shown online, in our brochures and in our **ROOFViewer®** tool may not accurately reflect shingle colour and do not fully represent the entire colour blend range nor the impact of sunlight.

NOTE: Product and colour availability may vary by region. ¹See Limited Warranty at IKO.com for complete terms, conditions, restrictions and application requirements. Shingles must be applied in accordance with application instructions and local building code requirements. ²"Lifetime" means the period of time commencing on the date of the completion of the installation of the shingles on the building, and continuing so long as the original Owner owns the building on which the shingles were installed. ³All values shown are approximate. ⁴Products are developed with reference to these standards. ⁵This impact rating is solely for the purpose of enabling residential property owners to obtain a reduction in their residential insurance premium, if available. It is not to be construed as any type of express or implied warranty or guarantee of the impact performance of this shingle by the manufacturer, supplier or installer and damage from hail is not covered by the Limited Warranty. IKO recommends the use of its Class 4 impact resistance rated Hip and Ridge cap shingle in conjunction with the use of Class 4 impact resistance rated shingles, and the use of no less than its Class 3 impact resistance rated Hip and Ridge cap shingle in conjunction with the use of Class 3 impact resistance rated shingles. For further detail concerning the FM 4473 standards, visit the FM Approvals website.
