IKO Enerfoil Sheathing

WALL INSULATION

Foil-Faced Polyiso

IKO Enerfoil Sheathing is a rigid, polyisocyanurate foam insulation with high thermal properties. It is constructed from closed cell polyisocyanurate foam core bonded on each side to aluminum foil facers during the manufacturing process.

Multi-Purpose Sheathing

When used with AquaBarrier Tapes or AcrylicStick SA tapes, IKO Enerfoil offers four major benefits, all in one!

- Insulation
- Air Barrier
- Weather Resistive Vapour Barrier
- Controls Sound

Cost Effective

IKO Enerfoil has a high thermal R-value that provides outstanding insulation protection, which helps increase efficiency and reduce energy costs.

Built to Perform

Building owners and construction professionals are demanding more and more highly engineered building materials. IKO Enerfoil Sheathing Systems meet and exceed those expectations, especially designed with new acoustic properties, bringing maximum weather resistance and quiet comfort to structures.
