Elevate A Home's Appearance and its Solar Reflectivity.

IKO Cambridge Cool Colors shingles can be used to comply with Title 24, part 6, cool roof requirement, to help reduce a home's carbon footprint and potentially reduce home energy bills. Specially designed granules reflect more solar energy than conventional roofing granules.

The use of infra-red reflective pigments on the shingle surface transmits less of the sun's solar energy into a home's attic.

Matching or complementary IKO UltraHP® high-profile hip and ridge cap shingles are available to protect vulnerable roof areas and to create a truly stunning roofline.

To ensure complete satisfaction, please view several full size shingles and an actual roof installation prior to final color selection as the shingle swatches and photography shown online, in brochures and in our app may not accurately reflect shingle color, and do not fully represent the entire color blend range, nor the impact of sunlight.

¹See Limited Warranty at IKO.com for complete terms, conditions, restrictions, and application requirements. Shingles must be applied in accordance with application instructions and local building code requirements.

²High Wind Application is required. ³All values shown are approximate. ⁴Products developed with reference to these Standards. ⁵Only Dual Grey features an algae-resistant granule that helps inhibit discoloration caused by blue-green algae.
