Hip & Ridge 12™

RIDGE CAP SHINGLES

Ridge cap shingles protect and beautify.
Pre-tapered and perforated, no cutting required.

Hip & Ridge 12™

RIDGE CAP SHINGLES

Installation Instructions⁴

- ✔ Separate Hip & Ridge 12 shingles into thirds, using the perforation marks as a guide (see Diagram 1).
- ✔ These shingles are designed for a 5-5/8" (143 mm) exposure. For a neater appearance, the top of each side of each piece has been factory trimmed on a 1" (25 mm) taper, see Diagram 2.
- ✔ Bend each piece over the hip or ridge, and nail 6-1/4" (159 mm) above the butt edge, 1" (25 mm) in from each edge, exposing each piece 5-5/8" (143 mm).
- ✔ Apply hip pieces starting at the lower end of the hip, working up toward the ridge. On hip roofs, apply ridge pieces starting at each end, meeting in the middle.
- ✔ On gable roofs, apply ridge pieces starting at the end opposite to the prevailing wind direction and continue to the other end.
- ✔ The final shingle should be set in roofing cement, and the exposed nail heads of the final shingle should be covered with roofing cement.

Why waste time (and money) cutting up shingles to protect vulnerable hip and ridge areas?

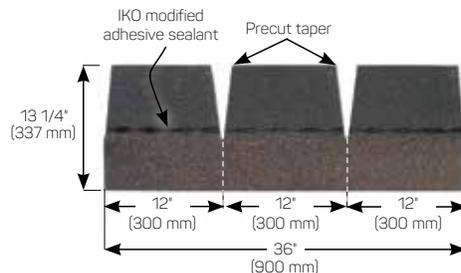

IKO Hip & Ridge 12 Shingles are pre-cut and include pre-tapered headlaps. Simply separate each shingle at the perforations and you're in business. No cutting. No waste. Just separate and get to work.

And we've just introduced new complementary color choices to co-ordinate with the color blends of IKO's most popular laminated shingles. Now you can offer this time-and-labor-saving finishing touch to more customers than ever before!

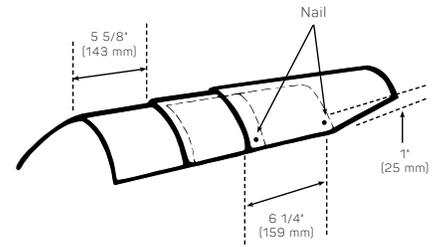

Hip & Ridge 12 Shingles Make a Big Difference!

- ✔ **They're quicker.** Less time spent means more money saved! Lightweight and perforated with a pre-cut tapered headlap to give you three pieces, each 12" (300 mm) by 13-1/4" (337mm)¹. By spending less time cutting, you'll save on labor costs.
- ✔ **They're safer.** Everyone benefits from a tidier job site! Because the pieces are pre-trimmed, your installers won't be slipping or tripping over cut scraps of shingle. Homeowners will appreciate a cleaner job site, too.
- ✔ **They look better.** Get great-looking results every time, in less time! No more uneven cuts. Because these cap shingles are pre-tapered, installers will be able to follow straighter application lines more consistently. If the profile requires dimensional depth, simply use a double layer.

¹Diagram 1

¹Diagram 2

Note: To obtain a three-dimensional effect, (which is recommended, but not required), apply hip and ridge shingles double thickness by stacking two pieces on top of one another, the lower piece extending about 3/4" (19 mm) farther than the top piece.

¹All values shown are approximate. ⁴Please consult detailed installation instructions prior to installation.

Now in colors that pair with our most popular laminated shingles!²
