

Shingles alone are usually not enough to protect your home. IKO has developed superior multi-layered roofing components for these vulnerable areas of your roof.

1. Eave Protection

GoldShield™, ArmourGard™, or StormShield™ Ice & Water Protectors

IKO's Ice & Water Protectors provide a second line of defense against water penetration due to ice dams or wind-driven rain and the costly damage it can cause. This product is also strongly recommended for sealing around vents, low pitch areas, ridges, hips, rake edges, chimneys, dormers, vent stacks, and skylights.

2. Underlayment

RoofGard-Cool Grey™ or Stormtite® Underlayment

Use our innovative RoofGard-Cool Grey or Stormtite synthetic underlayment for total deck protection.

3. Roof Starters

Leading Edge Plus™ Starter Strips

Fast, easy and convenient. IKO's Starter Strips are already cut to size, saving valuable time during the installation of the first course of shingles. Compatible with all existing IKO Shingles, Leading Edge Plus includes a sealant strip at the bottom edge allowing for a tight seal.

4. Ridge Cap Shingles

Hip & Ridge Plus™, Hip & Ridge 12™ or Ultra HPT™ High Profile Ridge Cap Shingles

Ridge cap shingles are required where roof planes meet, and provide additional protection along these high stress areas of the roof, enhancing your home's aesthetic appeal by accentuating the roof line.
