Cutting Service

IKO AccuCut™

Insulation Custom-Cutting Service

Introducing IKO AccuCut **Another Competitive Edge from IKO!**

Now you can have an IKO polyiso board pre-cut at our factory to the size you need.

What is IKO AccuCut?

IKO AccuCut is our new service of custom-cutting polyisocyanurate insulation sheathing (wall and roof board) at the plant to specified sizes, while creating straight and clean edges that make installation easier. Building Envelope and Roofing contractors have been asking for this factory-milled cutting service, and we're pleased it's now available across Canada.

At IKO, we rely on innovative ideas from the field as well as from within the company. Our network of professional contractors is helping us continue to lead our industry, as we have been doing for over half a century.

What products are available with IKO AccuCut?

IKO Ener-Air™, IKO EnerFoil™, IKOTherm™, IKOTherm III™ and IKOTherm CoverShield™ panels can all be ordered with IKO AccuCut custom-cutting¹. IKO's standard 4 x 4 and 4 x 8 foot panels (4 x 9 foot panels - Eastern Canada only) can be cut into two widths of 24 inches wide each or three widths of 16 inches wide each. To accommodate metric sizing, widths of 400 mm and 600 mm are also available. Thicknesses are not affected and range from IKO's wide selection of 1/2 to four inch boards, according to the product chosen.

¹IKO AccuCut is NOT available on IKOTherm tapered panels.

IKO AccuCut™

Insulation Custom-Cutting Service

What makes IKO AccuCut so much better?

IKO AccuCut panels will save you time, labour, money and material on the jobsite, allowing you to complete jobs faster so you can take on more projects. Less time. Less waste. Less labour. More jobs. More profit!

How much does IKO AccuCut cost?

There is a nominal cost for IKO AccuCut. Please contact your local Authorized IKO Distributor for more details.

How do I order it?

Simply place your order with your local Authorized IKO Distributor. Be sure to specify IKO AccuCut and the appropriate dimensions, by product. Orders are delivered factory-bagged² on skids (to protect the panels in transit) and are clearly labeled with the specified dimensions so the right-sized panels can be quickly identified. The minimum order quantity is one skid³.

What's the lead-time?

Please allow 2-3 weeks for delivery. Times will vary depending on the jobsite's geographic distance from the plant and customer demand.

²The wrap is not meant to provide weather protection. Panels should be stored indoors and installed as soon as practical. If outdoor storage is unavoidable, slit the wrap to minimize condensation inside the packaging, stack the panels on pallets at least two inches above ground level and cover them with a waterproof tarp.

³The number of panels per skid will vary according to the chosen thickness of your panels.
