ArmourCool™
REFLECTIVE ROOFING SYSTEM

• High Solar Reflective Index
• Complies with LEED Credit SS 7.2
• No Additional Coatings
• Installs like a Standard Cap

Substantial contribution towards improving building energy performance.
Durable, strong and highly reflective. Full system performance from one manufacturer as single source for system components.

Reduces the urban heat-island effect and blocks heat transmission
• Decreases roof temperature and reflects the sun’s rays.
• Polyiso insulation in the system has the best R-value per inch of any commonly available insulation on the market today.

Highly reflective and cost effective
• Solar Reflective Index (SRI) of 82 exceeds LEED requirements (SS 7.2) and achieves crucial LEED points for the building.
• May reduce costs associated with energy consumption.

Flexible, no additional coatings required
• Easy and efficient membrane application.
• Installs like a standard cap and can be used over a wide variety of IKO systems and assembly methods.
• Heat-fused for a monolithic bond.

Durability
• The IKO ArmourCool Reflect System undergoes fewer large temperature fluctuations (compared to a dark surface) thus reducing potential issues with thermal shock.

Class A PrevENT™ ArmourCool version available for additional fire protection.
**Products**
- Carrara™ ArmourCool™ HD
- ArmourCool™ Granular TP-HD
- PrevENt™ ArmourCool™ Granular TP-HD

**Draft Specifications**
- Draft specs are available from IKO.COM/COMM or your local IKO Commercial Representative.

**CSA 123.21-14**
- Forms part of a CSA 123.21-14 Compliant System.

**Codes & Approvals**
- Factory Mutual (FM)
  - ArmourCool Cap forms part of a Class 1 roofing assembly when combined with other IKO roofing products as well as other common roofing products. ArmourCool is Class C rated to a 1/2:12 slope limit.
  - The PrevENt version of ArmourCool Cap is Class A rated to a 1-1/2:12 slope limit.

**Underwriters Laboratories**
- ArmourCool Cap sheets are certified and approved for use in all IKO Modified Bitumen roofing systems to CAN/ULC S126M construction C46 and UL1256 constructions R120 and R123 and to CAN/ULC S107 and UL790 to various slope limits depending on the configuration of the building and assembly selected.
- ArmourCool Cap sheets easily comply with the requirements of CGSB 37GP-56M and ASTM D6164, modified bitumen manufacturing standards for polyester reinforced SBS Modified Bitumen sheet membranes.

**Technical Support**
- Hands-on demonstrations and applicator training.
- On-site reviews.
- Specification assistance.

*Note: Sample ArmourCool Reflect System shown. Alternate system component options available.*
ACCESSORY PRODUCTS

IKO ArmourReflect White Coat
- Can be applied to most surfaces.
- Acrylic-based, breathable, elastomeric and highly reflective white coating.
- Applied by brush or roller.
- Great touch-up for IKO ArmourCool cap sheets.

IKO Water Based Adhesive
- Solvent free surface preparation intended for use with IKO self-adhering roof membranes, AquaBarrier self-adhering membranes or heat-welded membrane products.
- Suitable for use on most substrates including wood, glass mat, gypsum core sheathing, masonry, concrete and metal.

IKO Millennium Adhesive
- Used to adhere various board stock products to approved substrates.
- Highly elastomeric, low-rise formable adhesive in convenient packaging.
- Solvent-free, and sets in minutes.
- Ready to use with a rapid cure.
- Available as four cartridges per case and PG-1 Pump Grade two-part sets.
